Good e-book and helpful one. It can be written in basic phrases rather than confusing. I realized this

MOTHS IN YOUR POCKET: A GUIDE TO THE SATURN AND SPHINX MOTHS OF THE UPPER MIDWEST

University of Iowa Press, United States, 2015. Spiral bound. Book Condition: New. 229 x 104 mm. Language: English . Brand New Book. This welcome addition to Iowa s popular series of laminated guides--the twenty-seventh in the series--illustrates fifty-one species commonly found in the Upper Midwest states of Illinois, Iowa, Indiana, Michigan, Minnesota, Ohio, and Wisconsin. The Saturniid, or Giant Silk moths, are well named. Their large size--up to 6.5 inches for the cecropia moth--and the soft silky browns, greens, and oranges of their wings are unforgettable when they appear at a lighted window at night. Equally well named are the Sphinx or Hawk moths, important pollinators that hover like hummingbirds when nectar-feeding at dusk and even in daylight. The caterpillars of both families can be just as distinctive as the adults, as anyone who has ever come upon a tobacco or a tomato hornworm can attest. For each species the authors have included common and scientific names, wingspan, and time of flight for the adults at this final stage in their life cycle. Striking photographs of the adult moths and of their larval stages make this guide as beautiful as it is useful. For all naturalists captivated by the clear window eyespots of a Swallow-tailed Luna moth, the dark eyespots and bright yellow pupils of an Io moth, or the extendable proboscis of a White-lined Sphinx moth flitting from one moss rose to another, the photographs and descriptions in Moths in Your Pocket will be an invaluable reference.
